

Auctions, Appraisals, Acquisitions, Solutions

FOR IMMEDIATE RELEASE

Pittsburgh, PA, April 13, 2009. M. Davis Group, LLC is pleased to announce the upcoming auction sale at Golden Cheese of California (DFA), at 9:30 AM PST on August 6 & 7, 2009 in Corona, CA.

The auction will take place at the Company's 420,000-square foot building set on a 34-acre site. At its peak, the plant produced approximately 200 million pounds of Cheddar, Monterey Jack, Colby Jack and Muenster a year for industrial and retail cheese sales, equivalent to about 35 percent of the American cheeses consumed by people in California. "This will be, by far, the largest auction of dairy processing equipment ever to occur," says Martin Davis, CEO of M. Davis Group, adding that it arguably is 5-10 times the size of typical cheese plant auctions. "It's really a great opportunity for people who are improving plants or building new plants."

"This will attract a wide variety of both domestic and international buyers — people all the way from producers to other major processors and packagers," Davis says. "Some will be interested in buying some of the equipment as complete lines, and some will be interested in buying individual pieces of equipment. It's a very well-maintained plant." Davis says the auction has received a heavy interest already, and he has had inquiries from potential buyers from as far as Australia and New Zealand. Prospective buyers from around the globe are expected to participate in this auction both on site and via online bidding.

Inspections can be arranged by appointment immediately.
